We are what we eat / Healthy lifestyle (Unit 1)

Introduction: “Health is wealth.”

Body 1: Fast foods have many dangerous effects:

- dangerous effects
- avoid having fast foods.
- health problems (obesity – high blood pressure)

Body 2: The types of food we should have:

- probiotic drinks
- green tea
- the RDA of food elements

Conclusion: We must eat the right food to enjoy life.

“Health is wealth.” Nothing is better than having the right food. It's never been easier to eat healthily.

Some people think that fast food is easier and cheaper than eating healthily. That is not true because fast foods have many dangerous effects. They lead to many health problems. They cause obesity and high blood pressure. That's why we should avoid having fast foods.

Probiotic drinks are of great importance to lead a healthy life. They improve our immune system. In addition, they contain good bacteria. Moreover, having green tea is beneficial as it is full of antioxidants. We need to have the RDA of food elements like fats, proteins, minerals, carbs, water, vitamins, and iron.

All in all, it is now clear that we must eat the right food to enjoy life. It is said that “we are what we eat”. Food and drinks, which contain antioxidants, are good for our bodies. Antioxidants help combat diseases like cancer and arthritis.

Following a vegetarian lifestyle (Unit 1)

Introduction: Some people follow a vegetarian diet to live a healthy lifestyle.

Body 1: Why do some people depend greatly on vegetables as their main food?

- types of food they eat
- the benefits of vegetarian diets
- types of food they avoid

Body 2: The demerits of the vegetarian menu:

- lack of certain nutrients
- leads to malnutrition
- health problems

Conclusion: A vegetarian needs to make careful choices about their diet.

Some people follow a vegetarian diet to live a healthy lifestyle. A well-planned vegetarian diet can meet the needs of people of all ages. On the other hand, following a vegetarian menu irresponsibly can lead to health problems.

Some people depend greatly on vegetables as their main food. They don't eat meat, chicken, or fish. A person who chooses not to eat meat may enjoy better health, because they will eat more plant-based foods, and because they may be more active. A vegetarian diet reduces the risk of heart diseases, obesity, and some types of cancer, leading to a longer life. It may also lead to weight loss.

On the other hand, people who do not eat meat or fish may lack certain nutrients, especially if they are not consuming eggs or dairy products. Moreover, it leads to malnutrition. Becoming a vegetarian will not guarantee good health or a healthy diet. Anyone is at risk of poor health if they follow a vegetarian lifestyle without planning.

Finally, a vegetarian person needs to make careful choices about their diet, and to eat a wide variety of foods to ensure that they meet their nutritional needs. Some vegans may need to take supplements.

Reading Comprehension (1)

Read the following passage carefully, then answer the questions:

Sally was only eight years old when she heard her parents talking about her little brother, Georgi. He was very sick, and they had done everything they could afford to save his life. Only a very expensive surgery could help him now, and **that** was out of the financial question. She heard Daddy saying, "only a miracle can save him now."

Sally went to her bedroom and pulled her moneybox. She shook all the change out on the floor and counted it carefully. Three times. The total had to be exactly perfect. No chance here for mistakes. She left the apartment and made her way to the pharmacy. "What do you want?" the pharmacist asked in an **annoyed** tone of voice. "Well, my brother is sick, and I want to buy a miracle." "I beg your pardon," said the pharmacist. "My Daddy says only a miracle can save him now. So how much does a miracle cost?" "We don't sell miracles here, little girl. I can't help you." "Listen, I have the money to pay for it. Just tell me how much it costs."

A tear started down her cheek. "I just know he's sick and mom says he needs an operation. But they can't pay for it. So, I have my money." "How much do you have?" Asked the well-dressed man. "A dollar and eleven cents," Sally answered proudly. "And it's all the money I have in the world." He felt sorry for her. "Well, what a coincidence!" smiled the well-dressed man. "A dollar and eleven cents . . . the exact price of a miracle to save a little brother." He stooped down. He held her hand and said, "take me to where you live. I want to see your brother and meet your parents."

That well-dressed man was Dr. Carlton Armstrong. The operation was completed with no charge. It wasn't long until Georgi was home again and doing well. "That surgery," mom whispered. "It's like a miracle. I wonder how much it would have cost." Sally smiled to herself. She knew: just one dollar and eleven cents plus the faith of a little child.

Traveling to study can be a stressful experience. Many people are surprised when they experience the impact of culture shock. Colleges have started to recognize the problem and are starting several ways to help. Most colleges have upgraded their psychological counselling centres to handle students' shock. In addition, many schools are improving their vocational counselling services by giving students information about possible majors and career choices. In some colleges, first-year students are required to attend major career workshops. Sometimes, colleges train senior students to detect such problems and offer the needed help.

Pollution is any uncleanness of the environment. There are many kinds of pollution, and there are many pollutants. Air pollution can be caused by particles, liquids, or gases that make the air harmful to breathe. Soil pollution can be caused by pesticides, leakage from chemical tanks, oil spills, and other chemicals which get into the soil by dumping or accidental pollution. Water pollution can be caused by waste products, sewage, oil spills, and litter in streams, rivers, lakes, and oceans. Some scientists believe that water pollution is the largest cause of death and disease in the world. Radioactive pollution can be caused by leaks or spills of radioactive materials. These are the most common of pollutants and their causes.

E-readers are superior to books for many reasons. They provide helpful reading tips and tools that printed books do not. An e-reader allows its user to customise letter size, font, and line spacing. It also allows highlighting and electronic bookmarking. Furthermore, it grants users the ability to get an overview of a book and then jump to a specific location based on that overview. While these are all nice features, perhaps the most helpful of all is the ability to get dictionary definitions at the touch of a finger. On even the most basic e-reader, users can get instant definitions without having to hunt through a physical dictionary.

Summary Making 4

There are many reasons why we want to achieve success. Success is strongly related to our life plans. Achieving some milestones like graduating or getting a desired job brings us positive feelings. In addition, in many cases we want to experience benefits related with the achievement of a certain goal. This makes our success desirable and enjoyable. We shouldn't also forget that achieving success adds value to us. It is deep in our nature that we love the taste of winning. Furthermore, we all make mistakes which raise a strong force that will push us towards further goals. We lost, but in the end, we want to win. This victory can make up for all previous unpleasant experiences and failure.
